

M S SHARATH

SENIOR FRONTEND LEAD | SCALABLE ARCHITECTURE | AGILE DELIVERY

Phone: +91 7676169998 | Email: mrmssharath@gmail.com | LinkedIn: <https://linkedin.com/in/mssharath> | Location: Bengaluru, India

SUMMARY

Senior Frontend Engineer with **4+ years of experience** designing and delivering **scalable, high-performance web applications** and **cross-platform mobile applications**. Specialized in **React.js, JavaScript (ES6+), and modern frontend architecture** with strong expertise in **state management, Redux, reusable component design, and performance optimization**. Proven ability to **lead feature teams, drive Agile/Scrum execution, and deliver production-grade solutions in fast-paced environments**. Possess **2.2+ years of leadership experience** mentoring developers, conducting **architectural discussions**, improving **code quality standards**, and **optimizing development workflows**. Strong advocate of **Clean Architecture, modular design principles, CI/CD automation, and user-centric product engineering**.

PROFESSIONAL EXPERIENCE

Senior Frontend Lead Developer

Niveus Solutions Pvt. Ltd | Mangalore | Dec 2021 - Present

- Designed and developed **scalable React.js applications** with **modular architecture** and **reusable component design**.
- Built **high-performance user interfaces** optimized for **responsive design** and **cross-browser compatibility**.
- Reduced **development cycle time by 75%** by introducing **reusable UI component libraries, code standardization, and improved engineering best practices**.
- Architected **frontend state management** using **Redux** and implemented **scalable state management patterns**.
- Optimized **frontend performance**, reducing **application load time by 50%** and improving **Core Web Vitals** by implementing **lazy loading, memoization, and strategic code splitting**, resulting in enhanced **user engagement** and **responsiveness** and performance audits using **Google Lighthouse**.
- Improved overall **Lighthouse performance score** significantly through structured **performance optimization** initiatives.
- Reduced **production bug ratio by 52%** by enforcing **modular architecture**, implementing **unit testing** using **Jest**, and strengthening **code review practices**.
- Reduced **operational overhead by 40%** by implementing **modular architecture** and **automation strategies**, leading to a **32% reduction in development costs** and **significant improvements in engineering efficiency and business scalability**.
- Developed and maintained applications serving **50K+ active users**, ensuring **high availability, performance, and seamless user experience**.
- Integrated secure **RESTful APIs** and implemented **JWT authentication** for secure user sessions.
- Built and deployed **cross-platform mobile applications** using **Flutter and Dart** for **Android and iOS** platforms.
- Implemented **GetX state management** to enhance **maintainability, performance optimization, and scalable mobile architecture**.
- Led **feature planning, sprint execution, and production releases** in **Agile/Scrum environments**.
- Conducted comprehensive **code reviews** to enforce **clean coding standards**, reduce **production defects**, and improve **code quality**.
- Mentored junior developers on **frontend architecture, performance optimization, and advanced debugging strategies**.
- Collaborated with **product managers, UI/UX designers, and backend teams** to translate **business requirements** into **scalable frontend solutions**.
- Contributed to **CI/CD pipeline setup**, improving **deployment automation**, reducing **manual errors**, and enhancing **release efficiency**.
- Participated in **architectural discussions** to improve **application scalability, maintainability, and enterprise-level frontend systems**.
- Ensured **high code quality** assurance through **unit testing, structured testing practices, and systematic bug resolution**.
- Improved overall **application stability** by identifying **performance bottlenecks**, optimizing **rendering logic**, and refactoring legacy components.
- Assisted in **performance audits, frontend refactoring, and modernization of legacy codebases** to align with **modern product engineering standards**.

PHP Developer - Intern

Kakunje Software Pvt. Ltd | Mangalore | May 2021 – Nov 2021

- Developed **backend modules** using **Laravel, Symfony, and CodeIgniter** following **MVC architecture** and **OOP principles**.
- Designed and optimized **MySQL databases**, improving **query performance** and **data efficiency**.
- Integrated and optimized **RESTful APIs**, enhancing **API response time** and **backend performance**.
- Implemented **secure authentication, authorization, and input validation mechanisms**.
- Collaborated in **Agile/Scrum environments** using **Git-based version control workflows**.

LEADERSHIP & ENGINEERING IMPACT

- Led **frontend feature teams** and coordinated **cross-functional development** across multiple modules.
- Mentored and onboarded **junior developers**, improving **developer productivity**, **code quality standards**, and **technical mentorship practices**.
- Conducted **technical design discussions** and contributed to **architectural decision-making** for **scalable frontend systems**.
- Enforced **clean coding standards**, **modular architecture**, and **reusable component development practices**.
- Improved **sprint predictability**, **task estimation accuracy**, and **Agile delivery efficiency** through **structured planning**.
- Facilitated **knowledge-sharing sessions** on **React performance optimization**, **frontend best practices**, and **scalable UI architecture**.
- Acted as a bridge between **product stakeholders**, **UI/UX teams**, and **engineering teams** to ensure **feature alignment** and **business requirement translation**.
- Proactively identified **technical risks**, proposed **scalable solutions**, and ensured smooth **production deployments**.

TECHNICAL SKILLS

- **Frontend Engineering:** React.js, JavaScript (ES6+), Redux, HTML5, CSS3, Bootstrap, Component-based architecture, Responsive & adaptive UI design, Performance optimization (lazy loading, memoization, code splitting)
- **Mobile Development:** Flutter, Dart, GetX state management, Cross-platform Android & iOS development, Platform-specific optimization
- **Backend & APIs:** Node.js (Express, NestJS), RESTful APIs, GraphQL, JWT Authentication, Microservices architecture
- **Database & Caching:** MySQL, MongoDB, Redis caching strategies
- **DevOps & Cloud:** Docker, CI/CD (GitHub Actions, GitLab CI), Google Cloud fundamentals, Deployment pipelines & release management
- **Tools & Analytics:** Git, GitHub, JIRA, Postman, VS Code, Google Analytics, Power BI

CORE COMPETENCIES

- Scalable Frontend Architecture
- Product-focused Engineering
- Performance Optimization
- State Management Design
- API Integration & Security
- Agile & Scrum Leadership
- CI/CD & DevOps Collaboration
- Cross-functional Team Coordination
- Code Review & Quality Assurance
- Clean Architecture & Modular Development

EDUCATION

Master of Computer Application

St. Joseph Engineering College | 2019 – 2021 | Mangalore

- Focused on **software development**, **databases**, **web technologies**, and **programming principles**.

Bachelor of Computer Application

Shree Bharathi College | 2016 – 2019 | Mangalore

- Studied **programming**, **database systems**, **web development**, and **computer fundamentals**.

CERTIFICATIONS

- Google Analytics Certification – Google Skillshop
- Python Programming – Udemy
- Google Cloud: Machine Learning & Big Data Fundamentals – Coursera

LANGUAGES

- English – Proficient
- Kannada – Native
